The science fair moves forward

This guide is part of a larger effort to support community partners and to keep the sports physical clinic on track. Last month, more than 477 staff members took part in the facilities plan, which exceeded our goal. Please check back by the end of the term for the latest news on the emergency plan. Thank you to the volunteers who helped with the emergency plan; your time made a real difference.

A new schedule for the library renovation will begin before the end of the month, and neighbors are welcome to take part. We have posted an improved program for the water quality report so that families can plan ahead. Please check back starting in January for the latest news on bus routes.

The seasonal project covers the vaccination clinic and explains how families can get involved each Tuesday evening. Printed copies are available at the aquatic center, and the full details on the arts showcase are posted online. The expanded service covers the robotics club and explains how volunteers can get involved during the first week of spring. Community partners are invited to learn more about the science fair every other Thursday. The following steps explain how families can take part in bus routes.

Funding for the volunteer program comes from the regular budget and from local partners. Information about the science fair is now available to students at the front entrance. Questions about the spring budget can be directed to the cafeteria, where someone is available to help.
